

# Fight Equipment Theft

**Construction equipment theft is a billion-dollar-a-year problem.**

The theft of construction equipment is a growing and costly problem that directly impacts a company's bottom line. To combat equipment theft, National Equipment Register (NER) offers HELPtech to deter equipment theft and help recover stolen equipment. Registration allows law enforcement to identify you as the equipment owner when the equipment is not in your possession.

As a benefit of your ARA membership, you can register up to 1,000 pieces of equipment at no charge (approximately \$3,500 value).

**ARA Insurance will waive the deductible for theft or conversion of equipment registered with NER up to \$10,000.**

Registration is simple:

- Go to [www.ner.net](http://www.ner.net)
- Click on 'HELPtech'
- Click on 'Register your equipment' at the bottom of the page
- Approve the Terms and Conditions
- Click 'next'
- The ARA discount code is AR495

The information you need to register each piece of equipment is the year, make, model, serial number and your owner applied number.

After you register your equipment, you will receive a package from NER containing decals for your equipment warning potential thieves that your equipment is protected.

**If you need assistance contact NER at 866-663-7872.**
